

1. Создайте виртуальную машину и установите образ любой версии Ubuntu.
2. Необходимо проделать установку в режиме GUI на ваш выбор.
3. Добавляйте в отчёт только скриншоты процесса разметки диска

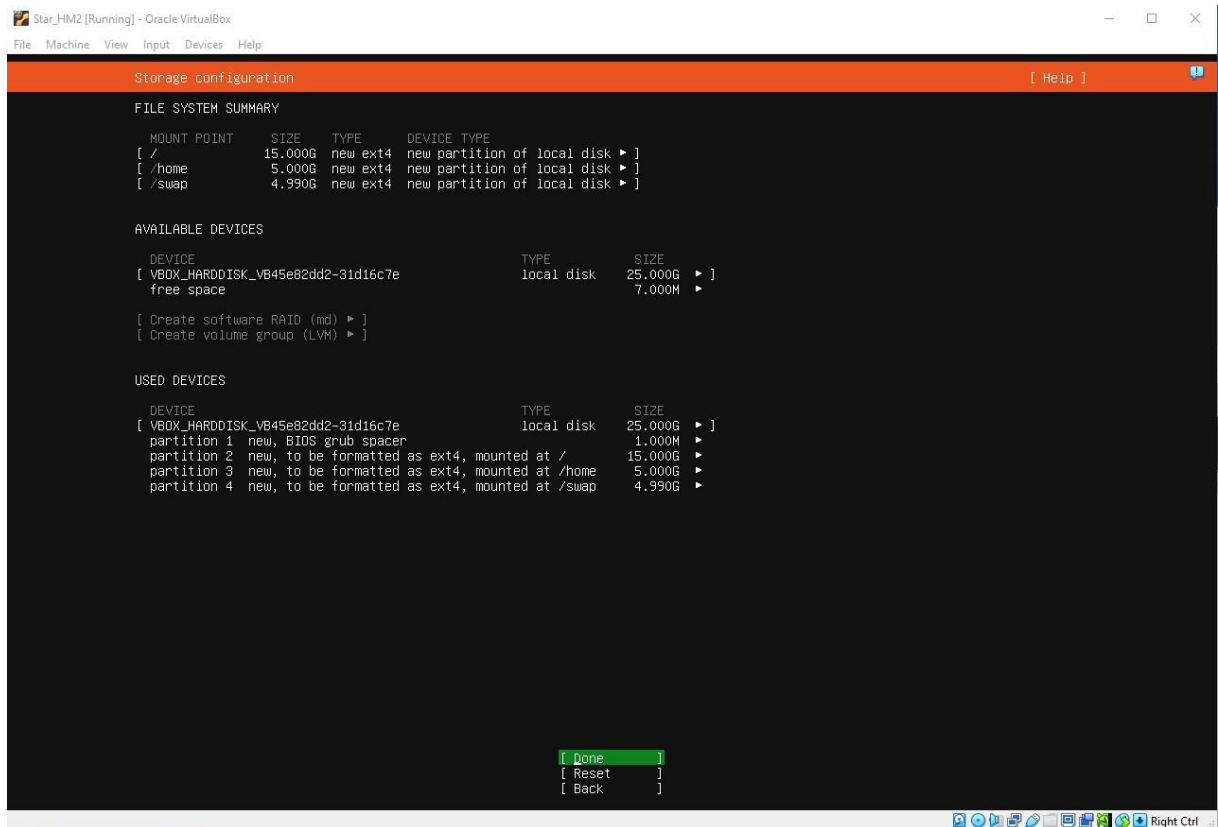

* Будет плюсом добавление в отчёт процесса создания своей структуры системы (напр., отдельный диск для папки home)

Final:

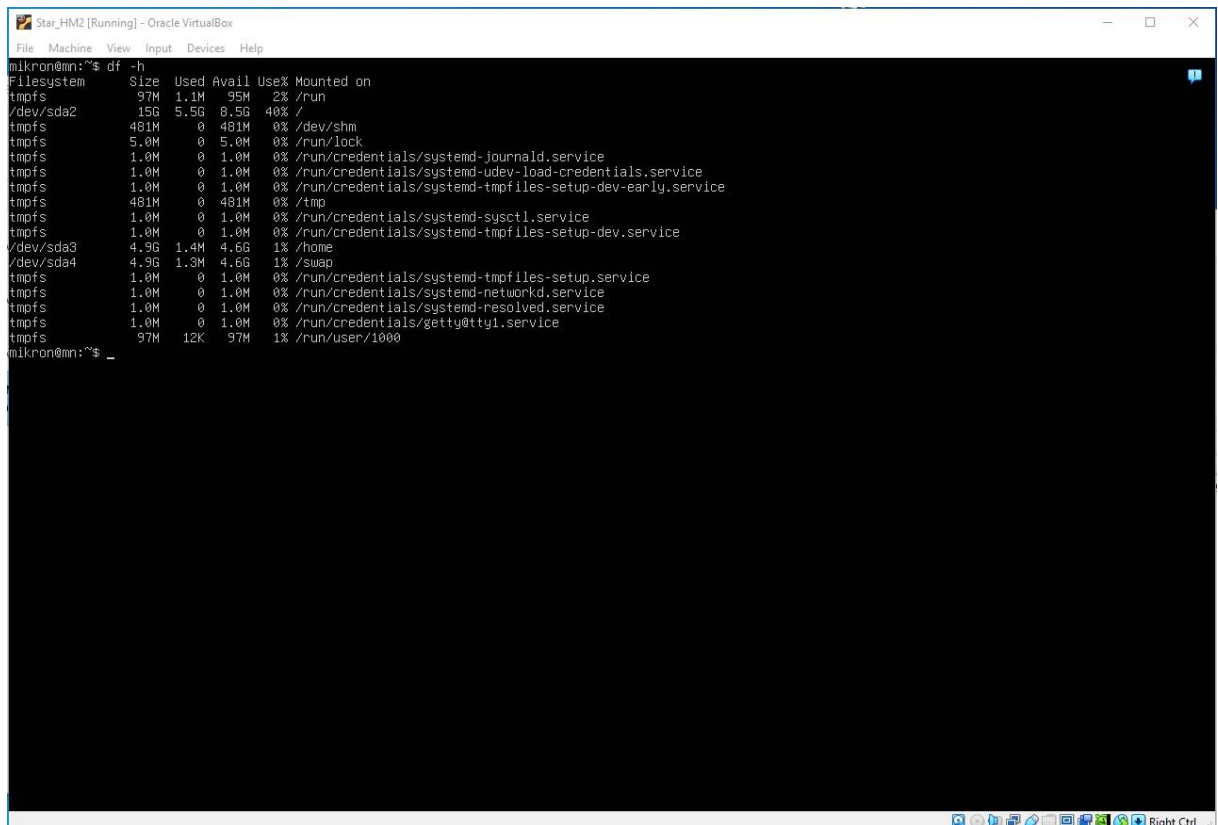

****То же самое, только установите ОС без графического окружения с командной строкой, а затем установите и настройте. Установка *ubuntu server*:**

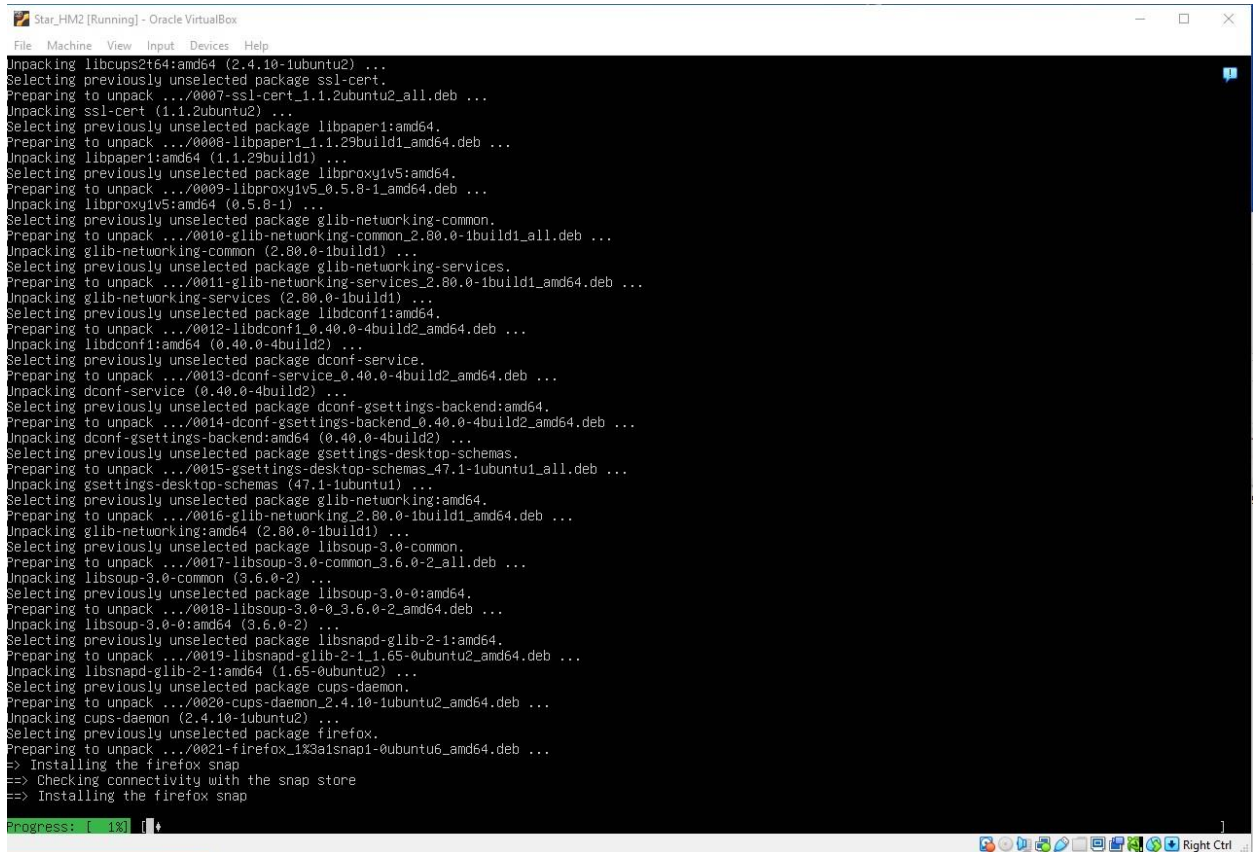

ОС с графическим окружением на ваш выбор

Результат монтирования: **df -h**

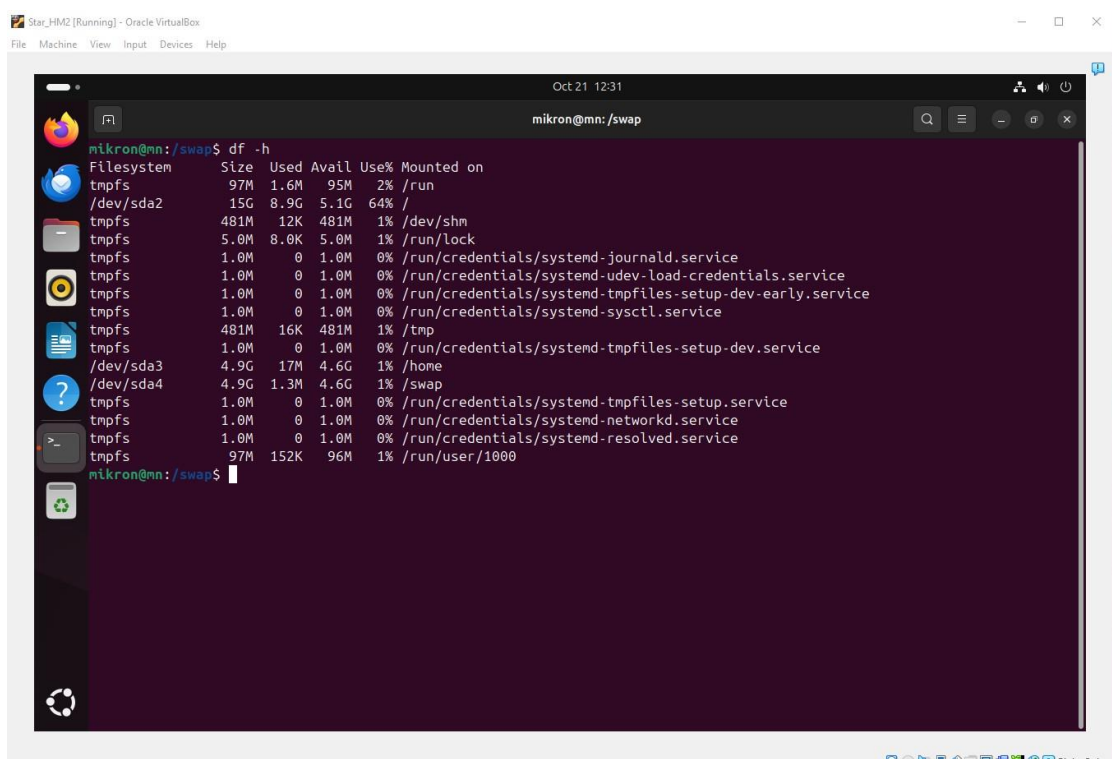

Установка GUI: `sudo apt install ubuntu-desktop -y`
